

# DARSH GAJDHAR

## Software Developer (React, Next.js, Node.js)

📍 Ahmedabad, Gujarat, India    📞 +91 7069494230    ✉ darsh2126gajdhar@gmail.com

### PROFESSIONAL SUMMARY

Results-driven Software Developer with nearly 4 years of hands-on experience in engineering performant, scalable web applications using **React, Next.js, TypeScript, and Tailwind CSS**. Experienced in designing enterprise workflows, including End-to-End ERP Systems (Prospect-to-Won stage pipeline tracking), dynamic state management, and custom dashboards. Proficient in integrating complex REST APIs with foundational experience in **Node.js and MySQL**.

### TECHNICAL SKILLS

|                               |                                                                                  |
|-------------------------------|----------------------------------------------------------------------------------|
| <b>Frontend Core:</b>         | React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, MUI |
| <b>State &amp; APIs:</b>      | Redux, Redux Toolkit, Context API, RESTful API Integration, Axios                |
| <b>Backend &amp; DB:</b>      | Node.js (Express.js), MySQL, Basic Python & FastAPI                              |
| <b>Tools &amp; Workflows:</b> | Git, GitLab, ESLint, Prettier, Webpack, Postman, Docker (Basics)                 |

### WORK EXPERIENCE

#### Software Developer | Upforce Tech, Ahmedabad, Gujarat

Oct 2022 – Present

##### • Enterprise ERP Lifecycle & Prospect Management System

*Comprehensive internal platform managing project lifecycles from initial Prospect lead generation to the final Won deal stage.*

- Engineered interactive lead-tracking Kanban boards and status progression flows (Prospect → Qualification → Proposal → Won stage) with granular RBAC permissions.
- Built dynamic form builders and automated stage validation logic using React, Redux Toolkit, and Tailwind CSS, reducing data entry errors for sales teams.
- Integrated RESTful APIs powered by Node.js and MySQL to manage deal stages, audit logs, and analytics metrics for executive dashboards.

##### • Video Awareness & Content Platform

*A global web application enabling young content creators to share short-form video content on high-impact social topics.*

- Architected core frontend interface using React and Redux, managing state across complex video feeds and user engagement features.
- Enhanced security protocols by integrating Two-Factor Authentication (2FA) and custom Password Strength Evaluation meters.
- Standardized code quality across team repositories by configuring unified ESLint and Prettier style rules.

##### • Real-time Face Detection & Webcam Analysis App

*Next.js application capturing live webcam snapshots or file uploads for real-time facial analytics processing.*

- Developed dynamic image capture workflows using Next.js, integrating third-party facial analysis APIs for fast evaluation.
- Optimized frontend image render pipeline and responsive canvas elements for seamless cross-device mobile and desktop usability.

##### • Financial & Life Expectancy Tracker

*Full-stack web application projecting annual financial metrics and dynamic life expectancy indicators based on user cash flow.*

- Designed and developed frontend modules using Next.js and Redux for interactive financial data visualization.
- Built backend service endpoints using Node.js and MySQL to execute user expenditure calculations and persist history.

### EDUCATION

**Bachelor of Engineering in Computer Engineering** — A.D. Patel Institute of Technology, Anand    **July 2018 – May 2022**
