PROFESSIONAL SUMMARY

Results-driven Software Developer with nearly 4 years of hands-on experience building performant, responsive, and scalable web applications using React, Next.js, TypeScript, and Tailwind CSS. Proven track record in developing enterprise software architectures, including end-to-end ERP project lifecycle systems (Prospect to Won deal stage progression). Proficient in state management with Redux Toolkit, RESTful API integration, and backend development with Node.js and MySQL.

TECHNICAL SKILLS

Front End: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI (MUI)

State Management & APIs: Redux, Redux Toolkit, Context API, RESTful APIs, Axios

Back End & Databases: Node.js, Express.js, MySQL

Tools & Workflows: Docker, Git, GitLab, ESLint, Prettier, Webpack, Postman

WORK EXPERIENCE

Software Developer — Upforce Tech

Oct 2022 – Present

Ahmedabad, Gujarat, India

Enterprise ERP Lifecycle & Prospect Management System

- Engineered interactive lead-tracking Kanban boards and status progression flows (Prospect, Qualification, Proposal, Won) with granular Role-Based Access Control (RBAC).
- Built dynamic form builders and automated stage validation logic using React, Redux Toolkit, and Tailwind CSS, reducing data entry errors for sales teams.
- Integrated RESTful APIs powered by Node.js and MySQL to manage deal stages, audit logs, and analytics metrics for executive dashboards.

Financial & Life Expectancy Tracker

- Designed interactive financial visualization components using Next.js and Redux for real-time asset and cash-flow analytics.
- Built backend service endpoints in Node.js and MySQL to process expenditure calculations and persist user transaction history.

Video Awareness & Content Platform

- Architected core frontend interface using React and Redux, managing complex state across video feeds and user engagement features.
- Implemented security enhancements including Two-Factor Authentication (2FA) and custom Password Strength Evaluation meters.
- Configured repository-wide code quality and formatting standardizations using ESLint and Prettier.

Real-time Face Detection & Webcam Analysis Application

- Developed dynamic image capture and upload workflows using Next.js and third-party facial analysis APIs.
- Optimized frontend render pipeline and responsive canvas elements for seamless cross-device performance.

EDUCATION

Bachelor of Engineering in Computer Engineering — A.D. Patel Institute of Technology, Anand July 2018 – May 2022
